Pre-Owned Patternless Edgers

Refurbished, calibrated and patient ready

Reconditioned to factory specifications by Santinelli trained technicians. Patternless edgers allow your practice to create additional income while offering virtually zero
turn
around for prescription lens orders.

Santinelli ME-1000

Fully featured edger which includes a built-in drilling system in addition to the features of the LEX-1000. This is one generation behind the current drilling capable edger, the ME-1200. We provide an all-inclusive package deal which includes everything you need to get started with in-house edging!

Santinelli LEX-1000

This edger upgrades the processing speed of the previous models and has features such as the safety bevel, built-in tracer, and high curve abilities. We provide an all-inclusive package deal which includes everything you need to get started with in-house edging!

Santinelli LE-1000

This model upgrades from the LE-9000 to include features such as a safety bevel, built-in tracer, and easy shape editor. We provide an all-inclusive package deal which includes

everything you need to get started with in-house edging!

Santinelli LE-9000

This is a great entry-level edger for a growing practice. The SX, and SX Express models include a safety bevel as well as the built-in tracer. We provide an all-inclusive package deal which includes everything you need to get started with in-house edging!
