

### WHAT DOCTORS SAY

*"I've been working with Luis and Used Eye Equipment since 2021. Every purchase has been a satisfaction guaranteed. His team helped me in every step of the process."*

*Esmelin Mata MD, Venezuela.*

*Our vintage Coherent argon laser stopped working abruptly. Laser repair services are few, and usually require costly air travel for the technician to make a site visit just to diagnose the problem. I made several unsuccessful contacts, even with providers who we've worked within the past. No one wanted to even look at our laser. I got in touch with Luis at Used Eye Equipment. We agreed to ship the laser out to his facility (at less cost than the usual airfare for a technician to travel here). The problem was diagnosed, and we came to a fair and reasonable price to replace the laser. Although our offices are quite a distance apart, we kept in frequent communication by phone and email, so there were no surprises as to the progress of the job. We're back up and running today and I couldn't be happier with the experience. I would recommend Used Eye Equipment to anyone who needs to repair or replace their ophthalmic equipment.*

*Jeffrey S. Rapkin, MD*
